

THOMAS SIMM LITTLER PRIZE

- 1970 Dr John Bench
- 1971 Dr S D G Stephens
- 1972 Dr Andreas Markides
- 1973 Dr E F Evans
- 1974 Miss V Williams
- 1975 Dr J Coleman
- 1978 Dr Graham Pick
- 1979 J G Kyle
- 1981 Mr Richard Tyler for his paper at the Nottingham Meeting
- 1982 Dr Mike Wald
- 1983 Dr Brian C J Moore
- 1984 Dr David Kemp for the *echo-phenomenon*
- 1985 Mr Jonathan W P Hazell, FRCS, for his contribution to the original work of the mechanisms underlying tinnitus
- 1986 Institute of Hearing Research for its work on the national study of hearing
- 1987 Dr Stuart Gatehouse for his scientific contributions to audiology and the study of hearing disorders
- 1988 Dr Stuart Rosen for his contribution to the psycho-phonetics of hearing loss
- 1989 Dr Mark Lutman for his contributions to clinical psychoacoustics and instrumentation
- 1990 Dr Robert Marchbanks for his papers on tympanic membrane displacement and its relationship with cerebrospinal fluid pressure
- 1991 Dr John Stevens for his work in applying new techniques for neonatal screening of hearing
- 1992 Dr Lucy Yardley for her innovative work in evaluating the handicap associated with vertigo
- 1993 Mr David Baguley for his work on the audiological characteristics and consequences - acoustic neuromata

- 1994 Dr Heather Fortnum for her research in Hearing Impairment and Public Health
- 1995 Professor Quentin Summerfield in recognition of his role co-ordinating the Department of Health programme of evaluation of cochlear implants
- 1996 Dr Andrew Forge for contributions to our understanding of cochlear ultrastructure, ototoxicity and hair cell regeneration
- 1997 Professor Carole Hackney for contributions to our understanding of cochlear and brainstem anatomy and their application to audiology, encouraging public awareness
- 1998 Dr David Moore in recognition of his contributions to the understanding of the development of the auditory system under normal and abnormal conditions
- 1999 Professor Adrian Davis for his many contributions to the understanding of the prevalence and early detection of hearing loss
- 2000 Dr Borka Ceranic for her research into oto-acoustic emissions, particularly with respect to the objective correlation of tinnitus, and a better understanding of the pathophysiological mechanisms of Meniere's disease
- 2001 Dr Kevin Munro for his contribution to research in Audiology, particularly for the development of techniques for hearing aid provision and in defining the relevance of cochlear dead regions
- 2002 Pauline Smith for her expert chairmanship of the Education Committee over the past three years
- 2003 Guy Lightfoot
- 2004 John Bamford for his contribution to Audiology including work on children's hearing aid services and modernisation programme
- 2005 Brian Moore for his significant contribution to the furtherance of hearing science
- 2006 Robert Marchbanks for scientific innovation. He and his colleagues have developed a cerebral and cochlear fluid pressure analyser which monitors brain pressure activity in the cochlear aqueduct. This is a great innovation and is being used in the NHS and its ideas are also being tested in space.
- 2007 John Bamford for Leadership and Vision in Paediatric Audiology
- 2008 Colette McKay for her contribution across a broad range of scientific areas related to deafness, audiology and communication, including auditory processing, language development in children, and mental health.
