

BSA e-Update & SIG Spotlight

February 2023

We were pleased to see new members joining our committee. This will add to the diversity of voices within the group and will hopefully reflect on our work. If you would like to participate please get in touch. There are various ways in how you can be participate or contribute.

In our recent group meeting we discussed feedback from the very well received face-to-face training event that took place in November 2022. Stemming from this feedback, we discussed ideas of future training events, trying to consider the most pressing matters currently affecting clinical practice. In our next meeting we will hopefully have a firm plan on how best to meet the members' training objectives that we've identified so far. It all starts with an idea, and if you have one... don't keep it to yourself!

We have already started minor revisions is a couple of published documents. It is envisaged that the new revised documents will be published within the next three months. The first one will be the OAE document. We will also be giving a talk at the BSA Scientific meeting on OAE so come and join us.
