

September 2023 BSA Electrophysiology Special Interest Group (EP)

Paul Bacon and Amanda Hall presented recently at the BSA Scientific Meeting on the Clinical Applications of Otoacoustic Emissions. Following this, we have been focusing on the minor and major revisions of the following documents:

- Recommended procedure clinical applications of Otoacoustic Emissions
- Practice Guidance ASSR testing
- Carried out literature review on ASSR BC testing
- ABR testing in Babies
- Principles Peer review
- Practice Guidelines for the Early Audiological Assessment and Management of Babies Referred from the Newborn Hearing Screening Programme.

In the present climate, a lot of attention has been drawn to the above documents and how these can play a role in the improvement of hearing services.
