

**Consultation:** *Guiding Principles of Person-Centred Care in Adult Hearing Rehabilitation (August 2024)*

**Opens:** 14 October 2024

**Closes:** 23:59, 09 December 2024

### **Instructions for completion**

Thank you for responding to our stakeholder (public) consultation.

Please navigate this form using the "Personal details" and "Response" tabs below.

Please fill in all of the cells in white.

Once you have completed this form, please send it to [bsa@thebsa.org.uk](mailto:bsa@thebsa.org.uk).

We welcome responses from all individuals, whether BSA members or not, and encourage responses from all sectors of the audiology community and related disciplines: clinical and academic, state and private sector, medical and scientific, manufacturers, other professional groups and bodies.

### **Personal details**

Your details allow us to review the level of response from different sectors of the audiology community.

You do not have to provide your personal details, but we will be unable to seek clarification from you if you do not.

However, if you consent, we may also contact you if we need further clarification.

We will not use your details for any other purpose or make them available to any third party.

Due to the usual volume of comments, please note that we do not respond to individuals unless clarification is required.

All responses are aggregated and anonymised before they are provided to the authors of the guidance document. Should the authors wish to seek clarification from individual respondents, they can only do so by requesting the BSA Professional Guidance Group (PGG) respond on their behalf where the respondent has consented. No personal details will be provided to the authors at any stage.

### **Response**

You may provide as many responses as you like.

Please ensure that each comment is provided on a separate row of the form.

The authors will consider all comments and it is at their discretion to make adjustments to the BSA draft guidance document. The Professional Guidance Group (PGG) ensures that the authors have responded appropriately to every comment. The authors and the PGG may jointly agree that alterations to the guidance are not supported or appropriate, based on the quality and level of evidence provided, or on preceding expert peer review.

The more evidence and rationale that can be offered in support of your comments, the better we will be able to assess alterations to the draft document. Evidence should be referenced wherever possible.

Please add comments relating to specific pieces of text in the document wherever possible.

Please put all of your comments into this form and do not attach any further comments as email text.

Consultation: Guiding Principles of Person-Centred Care in Adult Hearing Rehabilitation (August 2024)

Opens: 14 October 2024

Closes: 23:59, 09 December 2024

Your family name (optional):

Your first name (optional):
